Product Overview (for complete specifications, see pages 2 & 3) *****NEW***** See last page for **APPROVED CUT RELEASE**.

Construction: BABA, ARRA, RoHS, REACH and Prop 65 compliant. Extruded aluminum housing for superior fit and finish. Runs and patterns have a single item # and can be built to field dims.

Unbroken Illumination: Continuous illumination in custom-length runs and patterns with illuminated corners.

Electrical: LED components by major manufacturers, may be upgraded in the field to increase energy efficiency. Fixtures can be fitted with specialty LED and control components (consult factory). Standard Output, High Output and Custom Output options available.

Optical: Upper T.I.R. optic produces wide indirect illumination.

Standard Nomenclature

| Manufacturer | | Output | | Driver | | Mounting Method | | Paint Colors | | Paint Finish | |
|---------------------|--|----------------------|--|--|--|---|--|--|--|--------------------------------------|--|
| Gammalux | | S Standard Output | | ZTV10 0-10V Dim to 10% | | C Cable | | BK Black | | H High Gloss | |
| Series | | H High Output | | ZTV1 0-10V Dim to 1% | | S Swivel Stem | | W White (See color chart for other colors) | | SG Semi-Gloss | |
| Beam | | C Custom Output | | For all options, see next page | | SEQ CA Earthquake Stems/Fittings | | CCM Custom Color Match | | For wood finishes, see addendum page | |
| Cross Section (nom) | | Color Temp. (nom) | | Length Option | | SF Surface | | | | | |
| 2" x 2" | | 27 2700K 50 5000K | | N Nominal | | Consult factory for wall mount | | | | | |
| GB22U2 | | 30 3000K RGB* | | S Specific | | Unless ordered otherwise, cable mount canopies are white semi-gloss and all other painted mounting components match the fixture finish. | | | | | |
| - | | 35 3500K RGBW_ _ _ * | | | | | | | | | |
| - | | 40 4000K | | | | | | | | | |
| Model | | SL358 | | ZTV10 | | C24" | | TIR | | WSG | |
| 2nd Gen | | UNIV | | 4'N | | - | | - | | - | |
| Distribution | | CRI** | | Run or Pattern | | Suspension Length | | Options | | Shielding | |
| U Indirect | | 8 for 80+ | | Specify total run length (i.e. 43' 5 1/8") | | Distance to top of fixture. | | BPE Battery Pack (4' section) | | TIR Total Internal Reflection optic | |
| | | 9 for 90+ | | For illuminated patterns, follow overall length with L, T, X, U, RECT or SQ. Examples: | | If not suspended, leave blank. | | DL UL Damp Label | | | |
| | | Lamp | | 23'6" x 17'2" L Pattern would be 41'LPTTN. | | | | EMERG Emergency Ckt | | | |
| | | Voltage | | 12' x 12' Square Pattern would be 48'SQPTTN. | | | | 2CKT Dual Circuiting | | | |
| | | 120V, 277V, UNIV | | Provide leg dimensions as a line note in the spec. | | | | SBO Sensor By Others# | | | |

** 90+ CRI increases watts nom. 14.5%. # Sensor by Others (consult factory).

Specifications (continued on next page)

Electrical

Output: Standard (**S**) and high (**H**) options deliver a pre-set lumen package (see chart below). Custom-programmed output (**C**) is specified as LPF, WPF or % of High Output (see Custom Programmed Output page).

Static Driver: eldoLED [Optotronic](#)* programmable driver, wired for static operation (**DVR**).

0-10V Dimming: eldoLED [Optotronic](#)* programmable driver, wired for 0-10v control and dimming to 10% (**ZTV10**) or to 1% (**ZTV1**).

Step Dimming: Generic step dimming driver, two hot inputs for 100% and 50% output (**SD2**).

DALI Dimming: Generic DALI driver with two loose control wires exiting fixture at power feed location (**DALI**).

Lutron Dimming: [Hi-Lume](#) dim to 1% EcoSystem with Soft-On, Fade-to-Black (**LDE1**).

White Emitter: Nichia 757G emitters* binned within 3 MacAdam ellipses in Osram or Gammalux proprietary array. 90+ CRI option with extended lead time (CRI code **9**) results in nominal 14.5% drop in efficacy; increase calculated watts 14.5%.

Battery Pack: Bodine [BSL10T3](#)* (**BPE**). 4W max input, 10W initial output, delivers min. 27% of High Output value per 4' length.

LED System: 70% lumen output (L70) at max 85 degrees C calculated at >60k hours. Fixtures are shipped with anti-static gloves to minimize the risk of damage to LEDs during installation. [5 year limited warranty](#).

Sensors: Sensors are as specified, confirmed by Gammalux prior to factory quote. Examples are Enlighted [Micro Sensor](#), Lutron [Athena Wireles Node](#), Lutron [Vive](#), Wattstopper [FS-205](#).

Upgrade Capability: LED assemblies can be replaced in the future with the latest factory-provided and fully warranted components. On-board sensors, control interface devices and alternate LED components may be specified (consult factory). Fixtures bear UL & cUL Dry Location label. Damp Location label available (**DL**).

*Subject to availability; may be substituted by Gammalux. Components and specifications may be changed without notice.

| LUMENS AND WATTS BY OUTPUT OPTION AND LED COLOR @ 80+ CRI* | | | | | | | | | | | |
|---|--------|--------|---------|--------|--------|--|--------|--------|---------|--------|--------|
| STANDARD OUTPUT LED | | | | | | HIGH OUTPUT LED | | | | | |
| TOTAL INTERNAL REFLECTION (TIR) DELIVERS: 724 LPF | | | | | | TOTAL INTERNAL REFLECTION (TIR) DELIVERS: 965.3 LPF | | | | | |
| CCT | 2700 K | 3000 K | 3500 K* | 4000 K | 5000 K | CCT | 2700 K | 3000 K | 3500 K* | 4000 K | 5000 K |
| WATTS / FT. | 5.8 | 5.6 | 5.4 | 5.3 | 5.1 | WATTS / FT. | 8.6 | 7.4 | 7.3 | 7.1 | 6.8 |
| * IES FILES WERE CREATED USING 3500 K DIODES @ 80+ CRI. WATTAGE IS MULTIPLIED BY 1.06 FOR 2700 K, 1.02 FOR 3000 K, .98 FOR 4000 K AND .93 FOR 5000 K DIODES TO MAINTAIN THE SAME DELIVERED LUMENS THROUGHOUT ALL COLOR TEMPERATURES. FOR 90+ CRI, INCREASE WATTAGE BY 14.5%. SEE ADDENDUM FOR CUSTOM PROGRAMMING. | | | | | | | | | | | |

Construction

Housing: BABA, ARRA, RoHS, REACH and Prop 65 compliant. Extruded aluminum body 2.125" wide x 2.50" high, 6063T5, 0.070" min thickness. Each housing is 12' max unless longer housings are pre-coordinated with the factory to reduce joints and installation labor. Fixtures are built per approved factory drawings and tested as a complete system at the factory. Continuous runs and [patterns](#) are ordered, built and shipped with a single item #. Fixtures ordered as individuals are not designed to be joined together in the field.

Joiner System: Automatic alignment, no loose parts, one tool to tighten factory installed bolts for hairline seam. No light leaks. All fixtures are assembled into a complete pattern and tested for fit and finish at the factory prior to being individually packed and shipped.

Lamping: Patterns are fully illuminated. Runs ordered in Specific Length (Length Option **S**) will be built to the exact dimension shown on signature-approved shop drawings. Runs ordered in Nominal Length (Option **N**) may be factory-adjusted to accommodate standard mounting positions or grid centers. Factory drawings will show all dimensions of mounting and power feed locations. Fixtures built to less than 4' may require remote driver installation - consult factory.

Mounting: Aircraft cable is 7x7 stranded stainless steel with stopper fitting at the top end. Lower end strands are welded and ground for easy insertion into adjustable cable gripper (**C**). Feed cord is straight, white 3/C SVT or SJT #18 AWG. Unless specified otherwise, cable mount canopies are white semi-gloss and all other painted mounting components match the fixture finish.

Specifications (continued)

Optical

Reflectors: Shall be formed diffuse high reflectance aluminum.

Wide Indirect Optic: Snap-in. Total Internal Reflection optic, clear extruded acrylic (**TIR**).

Finish

Acid etched or clear anodized housing electrostatically sprayed with high solids aliphatic two component polyurethane high (**H**) or semi-gloss (**SG**) to an avg. thickness of 2 mils. Unless specified otherwise, cable mount canopies are white semi-gloss and all other painted mounting components match the fixture finish. Custom finish, consult factory. Wood Finishes, back page.

Satin Aluminum (SAPSG)

Black (BKSG)

Packing and Shipping

Fixtures built for continuous rows and patterns are given a specific location identifier, clearly identified on factory layout drawings, the fixture's ID Label, protective wrapping and on each end of fixture carton. Shipping pallets are built with 2" clearance, extending beyond the length and width of cartons, providing shipping protection.

Approx. weight of 4' module is 6 lbs. including carton. Weight of pallet and supplemental packing materials not factored in.

Gammalux Lighting Systems reserves the right to change the details of fixture design and construction at any time.

Custom Programmed Output

Custom Programmed Output can be specified to produce approximate Delivered Lumens per Foot, Percentage of High Output Value or Maximum Watts per Foot.

Delivered Lumens Per Foot

Gammalux deals only in delivered lumens per foot. When working to match or exceed a competitor product's Lumens Per Foot package, be sure you are looking at their Delivered (through the lens) lumens per foot, not their System (bare board) lumens per foot.

In the Gammalux item #, use **C** as the Output designator and add a fixture description stating the required Lumens Per Foot value (ie: if you need 600 lumens per foot delivered by the fixture, the line note would read "Program = 600 LPF").

Percentage of High Output Value

If the required delivered lumens per foot are not known, run lighting calculations using our High Output IES file and identify the percentage of increase or decrease required to produce the correct lighting in the space.

In the Gammalux item #, use **C** as the Output designator and add a fixture description stating the required percentage of decrease from our High Output value (ie: for 60% of our High Output value, the line note would read "Program = 60% of High Output").

Maximum Watts Per Foot

In the Gammalux item #, use **C** as the Output designator and add a fixture description stating the required Maximum Watts per Foot (ie: if you need the fixtures capped at a maximum of 7 watts per foot, the line note would read "Program = 7 WPF").

For all three methods, custom programming capability is currently 25-200% of our High Output value. For requirements outside of this range, consult factory.

Wood Finishes

Fixture housings are powder coated with a base finish, baked, then wrapped in a film with the decorative grain pattern. Baking the housing again allows the grain to become embedded into the powder coated finish. This is not a decal or veneer. Additional lead time and cost increases apply. Consult factory for pricing. Swatches are scaled accurately for 8.5" x 11" page.

FINISH CODE: KPI

FINISH CODE: MED

FINISH CODE: HCH

FINISH CODE: WAL

FINISH CODE: AOK

FINISH CODE: FWG

FINISH CODE: MH1

FINISH CODE: MH2

SAMPLE FIXTURE WITH WOOD FINISH

DUE TO VARIANCES IN MONITORS AND PRINTERS, ACTUAL FINISHES MAY APPEAR DIFFERENT FROM SWATCHES.

Approved Cut Release option

If offered for Approved Cut Release in the Gammalux factory quote, the product in the accompanying purchase order is authorized by the GC to be released to production without the need for factory drawings for approval.

I confirm that:

- all ordering options are clearly noted (highlighted, boxed, written in, etc.) on page 1 of this fixture cut sheet
- quoted leadtime begins upon Gammalux's confirmation that the P.O. and marked cut sheet match their quote.
- the order will be released to production and a "record only" drawing will be provided prior to product shipment
- changes after Gammalux's release to production will result in a minimum 25% change fee which increases as production progresses.
