

#### G-Beam Series GB35B2PE-LED-LENSCC.6 General Illumination - Suspended or Wall Mount

Bidirectional Distribution with Concave Lens and Profile End Cap

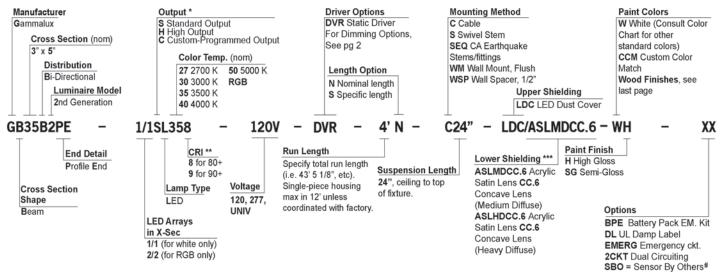

**Product Overview** (for complete specifications, see pages 2 & 3) \*\*\*\*\*\*NEW\*\*\*\*\*\* See last page for APPROVED CUT RELEASE. Construction: BABA, ARRA, RoHS, REACH and Prop 65 compliant. Extruded aluminum housing with Profile End provides superior fit and finish. Runs and patterns have a single item # and can be built to field dims.

Unbroken Illumination: Continuous illumination in custom-length runs and patterns with illuminated corners.

**Electrical:** LED components by major manufacturers, may be upgraded in the field to increase energy efficiency. Fixtures can be fitted with specialty LED and control components (consult factory). Standard Output, High Output and Custom Output options available.

Optical: Upper lens reduces shadows and eliminates striations on ceiling and walls. Lower Concave lens in medium diffusion.

### **Standard Nomenclature**

\*\* 90+ CRI increases watts nom. 14.5%. # Sensor by Others (consult factory).

### Specifications (continued on next page)

### Electrical

**Output:** Standard (S) and high (H) options deliver a pre-set lumen package (see chart below). Custom-programmed output (C) is specified as LPF, WPF or % of High Output (see Custom Programmed Output page).

Static Driver: eldoLED Optotronic\* programmable driver, wired for static operation (DVR).

0-10V Dimming: eldoLED Optotronic\* programmable driver, wired for 0-10v control and dimming to 10% (ZTV10) or to 1% (ZTV1).

Step Dimming: Generic step dimming driver, two hot inputs for 100% and 50% output (SD2).

DALI Dimming: Generic DALI driver with two loose control wires exiting fixture at power feed location (DALI).

Lutron Dimming: Hi-Lume dim to 1% EcoSystem with Soft-On, Fade-to-Black (LDE1).

White Emitter: Nichia 757G emitters\* binned within 3 MacAdam ellipses in Osram or Gammalux proprietary array. 90+ CRI option with extended lead time (CRI code 9) results in nominal 14.5% drop in efficacy; increase calculated watts 14.5%.

Battery Pack: Bodine BSL10T3\* (BPE). 4W max input, 10W initial output, delivers min. 27% of High Output value per 4' length.

**LED System:** 70% lumen output (L70) at max 85 degrees C calculated at >60k hours. Fixtures are shipped with anti-static gloves to minimize the risk of damage to LEDs during installation. 5 year limited warranty.

**Sensors:** Sensors are as specified, confirmed by Gammalux prior to factory quote. Examples are Enlighted Micro Sensor, Lutron Athena Wireles Node, Lutron Vive, Wattstopper FS-205.

**Upgrade Capability:** LED assemblies can be replaced in the future with the latest factory-provided and fully warranted components. On-board sensors, control interface devices and alternate LED components may be specified (consult factory). Fixtures bear UL & cUL Dry Location label. Damp Location label available (**DL**).

\*Subject to availability; may be substituted by Gammalux. Components and specifications may be changed without notice.

### Construction

**Housing:** BABA, ARRA, RoHS, REACH and Prop 65 compliant. Extruded aluminum body with Profie End 3.00" wide x 5.00" high, 6063T5, 0.070" min thickness. Profile end cap. Each housing is 12' max unless longer housings are pre-coordinated with the factory to reduce joints and installation labor. Fixtures are built per approved factory drawings and tested as a complete system at the factory. Continuous runs and patterns are ordered, built and shipped with a single item #. Fixtures ordered as individuals are not designed to be joined together in the field.

Joiner System: Automatic alignment, no loose parts, one tool to tighten factory installed bolts for hairline seam. No light leaks.

**Lamping:** Patterns are fully illuminated. Runs ordered in Specific Length (Length Option **S**) will be built to the exact dimension shown on signature-approved shop drawings. Runs ordered in Nominal Length (Option **N**) may be factory-adjusted to accomodate standard mounting positions or grid centers. Factory drawings will show all dimensions of mounting and power feed locations. Fixtures built to less than 4' may require remote driver installation - consult factory.

**Mounting:** Aircraft cable is 7x7 stranded stainless steel with top end stopper fitting. Lower end is welded and ground for easy insertion into adjustable cable gripper (**C**). Feed cord is straight, white 3/C SVT or SJT #18 AWG. Unless specified otherwise, cable mount canopies are white semi-gloss and all other painted mounting components match the fixture finish. Stems are 3/8" schedule 40 pipe with top swivels (**S**). California UBC compliant stems with internal safety cables (**SEQ**). Housing can be mounted direct to wall (**WM**). Wall Spacer mounting (**WSP**) allows projection from wall of 3.50" to meet ADA requirements.

G-Beam Series GB35B2PE-LED-LENSCC.6 General Illumination - Suspended or Wall Mount Bidirectional Distribution with Concave Lens and Profile End Cap

# **Specifications (continued)**

### Optical

Reflectors: Shall be formed diffuse high reflectance aluminum.

LED Diffusing Lens: Snap-in. Shall be 90% DR semi-clear acrylic (LDC).

Acrylic Satin Lens, Medium Diffuse, Concave: Snap-in, .6" rise. Shall be 100% DR acrylic (ASLMDCC.6).

Acrylic Satin Lens, Heavy Diffuse, Concave: Snap-in, .6" rise. Shall be 100% DR acrylic (ASLHDCC.6).

### Finish

Acid etched or clear annodized housing electrostatically sprayed with high solids aliphatic two component polyurethane high (H) or semi-gloss (SG) to an avg. thickness of 2 mils. Unless specified otherwise, cable mount canopies are white semi-gloss and all other painted mounting components match the fixture finish. Custom finish, consult factory. Wood Finishes, back page.

### **Packing and Shipping**

Fixtures built for continuous rows and patterns are given a specific location identifier, clearly identified on factory layout drawings, the fixture's ID Label, protective wrapping and on each end of fixture carton. Shipping pallets are built with 2" clearance, extending beyond the length and width of cartons, providing shipping protection.

Approx. weight of 4' module is 14 lbs. including carton. Weight of pallet and supplemental packing materials not factored in.

Factory Drawings: Fully dimensioned factory drawings will be provided upon receipt of purchase order.

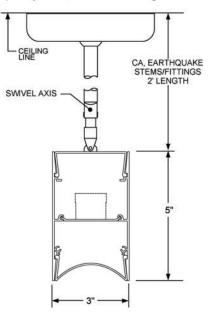

#### Cable Mount:

Specify C code in catalog #

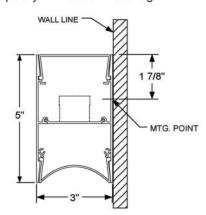

#### CA Earthquake Stem Mount: Specify SEQ code in catalog #

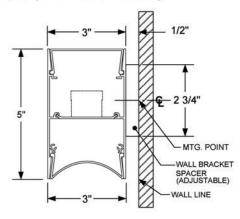

### Wall Mount:

Specify WM code in catalog #

Wall Spacer Mount: Specify WSP code in catalog #

Gammalux Lighting Systems reserves the right to change the details of fixture design and construction at any time.

### **Custom Programmed Output**

**Custom Programmed Output** can be specified to produce approximate Delivered Lumens per Foot, Percentage of High Output Value or Maximum Watts per Foot.

### **Delivered Lumens Per Foot**

Gammalux deals only in delivered lumens per foot. When working to match or exceed a competitor product's Lumens Per Foot package, be sure you are looking at their Delivered (through the lens) lumens per foot, not their System (bare board) lumens per foot.

In the Gammalux item #, use **C** as the Output designator and add a fixture description stating the required Lumens Per Foot value (ie: if you need 600 lumens per foot delivered by the fixture, the line note would read "Program = 600 LPF").

### Percentage of High Output Value

If the required delivered lumens per foot are not known, run lighting calculations using our High Output IES file and identify the percentage of increase or decrease required to produce the correct lighting in the space.

In the Gammalux item #, use **C** as the Output designator and add a fixture description stating the required percentage of decrease from our High Output value (ie: for 60% of our High Output value, the line note would read "Program = 60% of High Output").

### **Maximum Watts Per Foot**

In the Gammalux item #, use **C** as the Output designator and add a fixture description stating the required Maximum Watts per Foot (ie: if you need the fixtures capped at a maximum of 7 watts per foot, the line note would read "Program = 7 WPF").

For all three methods, custom programming capability is currently 25-200% of our High Output value. For requirements outside of this range, consult factory.

# **Wood Finishes**

Fixture housings are powder coated with a base finish, baked, then wrapped in a film with the decorative grain pattern. Baking the housing again allows the grain to become embedded into the powder coated finish. This is not a decal or veneer. Additional lead time and cost increases apply. Consult factory for pricing. Swatches are scaled accurately for 8.5" x 11" page.

SAMPLE FIXTURE WITH WOOD FINISH

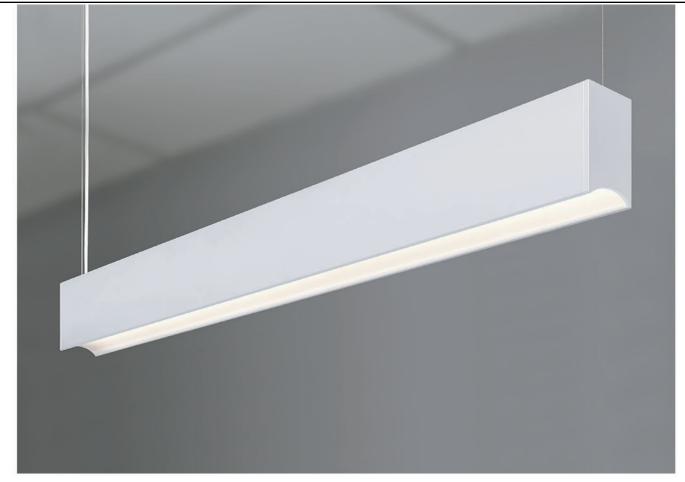

# DUE TO VARIANCES IN MONITORS AND PRINTERS, ACTUAL FINISHES MAY APPEAR DIFFERENT FROM SWATCHES.

# **Concave Lens Images**

# CC.6 CONCAVE LENS

# **Approved Cut Release option**

If offered for Approved Cut Release in the Gammalux factory quote, the product in the accompanying purchase order is authorized by the GC to be released to production without the need for factory drawings for approval.

I confirm that:

- all ordering options are clearly noted (highlighted, boxed, written in, etc.) on page 1 of this fixture cut sheet
- quoted leadtime begins upon Gammalux's confirmation that the P.O. and marked cut sheet match their quote.
- the order will be released to production and a "record only" drawing will be provided prior to product shipment
- changes after Gammalux's release to production will result in a minimum 25% change fee which increases as production progresses.
